

Electric Utility Product Application

Substation Maintenance

Rugged equipment for advanced processing of insulating oil found in: Transformers, Circuit Breakers, Switch Gear, and Load Tap Changers

Insulating Oil Filtration Equipment for Substation Apparatus

Transformers

- **Transformer Dehydration Systems (TDS Series)** for on-line processing
- **Superdri® (SD Series) Cartridges** for dissolved water removal
- **Aquacon® (AC Series) Cartridges** for free water removal
- **Superdri (SDS Series) Systems** for transformer filling

Circuit Breakers and Switch Gear

- **Aquacon (AC Series) Combination Cartridges** for carbon and free water removal (available in multi-length designs)
- **Pleated (FO Series) Filter Cartridges** for particulate solids removal (available in multi-length designs)
- **Portable (HP, HCP Series) Filtration Systems** for oil processing (available with 4-way valves, transfer valves, and other options)
- **Complete Oil Processing Trailers** with storage

Load Tap Changers

- **On-Line Systems (TP Series)** for carbon removal
- **SD-718P3 Filter Cartridges** for carbon & dissolved water removal from insulating oil in LTC's
- **High Efficiency/Capacity Micro-Glass Media (AC, FO Series) Filter Cartridges** for carbon and water removal
- **Portable (MP, HP, and HCP Series) Filtration Systems** for oil processing

When the owners of our equipment speak, Velcon listens. The products we build are designed with over twenty years of testing and input from users who demand the best.
