

Replacement Cartridges for Facet SuperFlex™ Housings

O Series Coalescer and SO Separator Remove Water and Dirt from Diesel, Jet Fuel and Avgas

- Reduces free and emulsified water to less than 50 ppm in diesel, and less than 15 ppm in jet fuel/avgas.
- Used in place of **Aquacon**® cartridges for continuous removal of free water
- For use in the Facet SuperFlex housings in diesel and jet fuel/avgas service

DESCRIPTION

The Velcon coalescer and separator are installed together in the Facet SuperFlex housing to remove water and dirt from fuel. The fuel passes from the outside to the inside through the coalescer. Dirt is filtered out of the fuel and free/emulsified water in fuel is coalesced. The coalesced water droplets, which form on the inside of the coalescer, are repelled from going further down-stream by the separator. The water settles down to the sump where it is manually drained.

NOTES:

1. If converting from Velcon's **Aquacon**® water absorbing cartridges to coalescer/separator cartridges, please order **Part Number EA35A** end seal plate.
2. Separators used for jet fuel/avgas applications (SO-4xxV5) are Teflon®-coated and can be cleaned and re-used. See data sheet #1242 for cleaning and maintenance instructions.
3. Separators used for diesel applications (SO-4xxPL) are made with pleated media. Changeout at 15 psid.

For information on other types of Velcon filter cartridges that can be used in the SuperFlex Housing, see below and corresponding data sheet as marked.
