

Low cost protection against dirt and water contamination of jet, gasoline, and diesel fuels.

STANDARD DESIGN FEATURES

- Air Vent and Drain Valves
- Epoxy Coated Interior, Primed Exterior
- Threaded Base Coalescer Cartridge
- 100 PSI Design Pressure
- Choice of Three Second Stage Cartridge Options
- Differential Pressure Gauge
- Leg Assembly

OPTIONAL FEATURES

- Male and Female Pipe Union
- Velcon CDF® Series Cartridges

The Velcon V818 series is designed for assuring CLEAN and DRY FUEL delivery at smaller installations. When the filter/separator is overloaded, secondary water defense can be obtained by using the Velcon CDF® Series cartridge option inside a Teflon® coated screen second stage. This option provides in a single vessel the ability to incorporate a three stage cartridge configuration comprising coalescers, separators, and CDF monitor cartridges to meet IP-1583 4th Edition Monitor Specs.

Installation is easy using standard pipe couplings. Male and female pipe union is available as an accessory for connection to the outlet to facilitate the installation and provide for quick cartridge changeout.
